

# THE EVENING NEWS.

JOHN H. HOLLIDAY, PROPRIETOR.

FRIDAY, MAY 17, 1872.

THE EVENING NEWS IS PUBLISHED EVERY WEEK-DAY AFTERNOON, AT FOUR O'CLOCK, AT THE OFFICE, SOUTH-EAST CORNER OF MERIDIAN AND CIRCLE STREETS.

PRICE: TWO CENTS.

## SUBSCRIPTIONS:

Subscribers served by carriers in any part of the city at ten cents per week.  
Subscribers served by mail, one copy one month, \$1.00.  
One copy for three months, \$2.50.  
One copy for one year, \$10.00.

## THE WEEKLY NEWS.

Is a handsome eight column folio, published every Wednesday.  
Price, \$1.00 per year.  
Specimen copies sent free on application.

NO ADVERTISEMENTS INSERTED AS EDITORIAL MATTER.

The Administration Republican Conventions of Michigan and Nebraska met yesterday and instructed for Grant.

How does the Terre Haute Express like the idea of training with its life-long enemy, Voorhees? If he goes for Grant who can it devote its columns to this summer?

Of the twenty-eight State delegations to the Philadelphia Convention, twenty-four have instructed for Grant and twelve for Colfax. Ex-Governor Dennison, of Ohio, Senator Wilson, James F. Wilson, of Iowa, and General Harlan, of Kentucky, are also candidates for the Vice Presidency, and each will go into convention with the vote of one or two States.

The newspaper wisecracks of the Grant press are already prophesying that the Tribune will die because Mr. Greeley has withdrawn from it. We should like to see the News die in the same way for a year or two. Journalists who write in such a way must have a very limited idea of the value of newspaper property, to think the life of the greatest one in the country depends upon a single man.

Signor Mario has deemed it necessary to apologize for his engagement at the Zerkel. Opera house in Madrid, in a letter addressed to the Correspondence. He says that necessity alone has compelled him to remain on the stage; he has incurred large losses by the failure of some firms in Florence, with whom he had deposited his fortune. But why should a man apologize for going to work? Thackeray would have called Mario a snob.—[Exchange.]

We don't think he would. Mario formally retired from the stage, and the occasion was duly celebrated. An apology for his unexpected re-appearance was in good taste, and was demanded by the peculiar circumstances compelling it.

A SPECIAL from Washington says the President recently informed a member of the House that he did not intend to make removals during the coming campaign for political reasons, nor to remove except for cause, and where he could testify valid objections to the Senate, as required by the tenure of office act. This is a very politic measure and one the Liberal movement has forced him into. The managers begin to see that they have cracked the whip too loudly and can no longer indulge in belligerent demonstrations. We are very much mistaken if the Liberal movement does not force them into other "reforms", but they will be made only for the purpose of securing votes, and not with the intention of abiding by them. This device is too thin and comes at too late an hour to have the desired effect.

LIBERALISM is something more than a name in a man or a newspaper. The men who are in the movement are willing to hear the voice of the opposition and the newspapers who advocate it are willing to print all that is said on either side. The New York Tribune has from the first published the harshest criticisms of Mr. Greeley of the administration papers, as freely as the favorable comments of the Liberal press. In this city the Sentinel has shown a like liberality, giving its readers the news, and this includes what other papers say.

The Journal, on the other hand, will publish nothing that will not subserve the administration interest. When the Democratic State Convention of Tennessee instructed for Greeley and Brown, it refused to publish the dispatch announcing the fact, and has never alluded to this important piece of news. When the New York Democratic Convention met this week and endorsed the Cincinnati platform, showing the utmost enthusiasm for its candidates, the ostrich policy again prevailed. Not one word is said of this important piece of news. Such a petty system may succeed a little while. In the end the people will learn the suppressed news, and give to it its full significance, and will learn to trust the papers that tell the truth without fear or favor. The action of Tennessee, the leading State of the South, and of New York, the leading State of the North, virtually settles the question of the action of the Baltimore Convention. The election of Greeley and Brown is a fact that every day is quietly and unmistakably asserting. The Bourbon elements in the old parties are beginning to wake up to this unpalatable fact.

## A Paraphrase of the Bible.

This question of retranslating the Bible is one that has been often discussed, and in favor of which much can be said. Since the time of King James the vernacular has changed in many respects, so that certain portions of the Bible now appear in such a crude, obsolete form as to often make passages very difficult to understand. Many errors, too, exist in the translation, which it would be well to correct, but a greater evil, perhaps, is the indiscriminate division into chapters and verses. This is comparatively a modern

innovation and was done entirely for convenience, so much so that the sense is often sacrificed. But a faithful retranslation is one thing and a paraphrase is another, and from such a one as has recently been published in England we want to be delivered. The grand old Saxon of King James's version loses nothing in comparison with the style of this work, and if a choice between them was compulsory, the former would stand to all time. We will quote an extract or two. The first is taken from that part of the opening chapter of St. Luke's gospel that describes the annunciation. The English version has it:

And when she saw him she was troubled at his saying, and cast in her mind what manner of salutation this should be. And the angel said unto her, Fear not, Mary;

The new version is as follows:

The presence of the voice of Gabriel filled her with astonishment and dread. There was besides a mystery in his salutation which confused her. The angel perceived her alarm and perplexity, and hastened both to reassure and inform her. "Fear not, Mary," he remarked.

This is certainly bad enough, but the grand sermon on the Mount is disfigured in a frightful manner, and some of Christ's most graphic illustrations are mangled so that no one could recognize them. Witness the following:

Remembering that a city placed on a hill could not be hid, the preacher exhorted his friends to let their light shine in like plainness before men, that they, perceiving its value and its beauty, might glorify him who bestows it, the great Father in the heavens. For, to employ another illustration, it was as much the reasonable duty of believers to show forth in themselves all the evangelical lustre they could, as it was the sensible usage of the master of a house to place his lighted candles not under domestic vessels, but in candlesticks, whence they would cast on the household their utmost radiance. \* \* \* No sensible man, the Master remarked, cuts a piece of cloth out of a new garment with which to mend an old one. For such a man well knows that besides the new garment being damaged by the cutting, the old bestow is not made better by the mending. On the contrary, it is made worse, because the frayed and rotten edges of its rent, not being able to support a stronger texture, loosen and give way further after the new cloth has been patched in, while its faded and worn appearance is rendered more apparent and unbecoming. And the speaker enjoined that the truth of every-day experience, that no man who has drunk old wine acquires at once a taste for new, for he says the old is good enough.

## Why Not Withdraw the Claim?

The importance of sustaining the Treaty of Washington has been felt by the thoughtful men of the country, not only because it promised an honorable settlement of all our grievances with the mother country, but because it established a new principle in the adjustment of international affairs, viz: arbitration. An arbitration is entirely different from a suit in a court in that neither party has any rights except what the other concedes. Both must be willing parties to the adjustment; one can not force the other to the adoption of any plan or measure, but both must agree to submit the various matters under certain conditions to the judgment of disinterested parties. No body attempts to deny that we made a blunder in asking that a claim for consequential damages should be passed on by the Geneva Board, and nobody defends any such preposterous claim. The English will suffer the treaty to fall rather than admit such a claim to the Board and then the whole responsibility for the failure of the treaty will be thrown on us. They have acted just as we should have done under the circumstances, and can not be blamed for it. Our government thinking it would be a sacrifice of national dignity would not wish to withdraw the claims, but finally as a compromise has proposed to offset it by making a supplemental one, providing that neither party shall be liable for consequential damages growing out of neglect of due diligence. The English government may accept this and it may not. We don't think it ought to make any difference, for we have nothing to gain by such a treaty, and the national dignity, if it is offended, will not be mollified by any such gratuitous folly. It is a useless diversion and may establish a precedent that will prove dangerous to us in the future, and for which we now receive no consideration. We have hoped all along that the treaty, which we regard as the only valuable and important work the administration has done, would succeed in the fullest measure, and that the principle of arbitration would be established. We regard the latter as a great improvement, and have therefore advocated an absolute withdrawal of the claim. There can be no sacrifice of dignity in this. We simply admit that we have made a mistake and wish to rectify it. We step out of the beaten track of diplomacy that clings to a mistake if once made, no matter what the consequences may be, and ascend to a higher plane of honesty and fair dealing. We introduce a new element, moral courage, into diplomacy, and set an example to other nations utterly unprecedented in the settlement of international differences. There can be nothing degrading in this; on the contrary, it is highly honorable, and we believe would be unqualifiedly approved by nine-tenths of our people.

## Political Notes.

Kilpatrick is very active in his support of the Cincinnati nominees.  
Gratz Brown is said to be the first red-haired aspirant for high office since Jefferson.

Andy Johnson's Attorney General, Henry Stanbery, says he does not hesitate to approve the action of the Cincinnati Convention.  
Wendell Phillips writes in his usually amiable tone that this is to be a Kilkenny fight; that whether Grant or Greeley wins, both parties will die in the effort.

The Pittsburgh Commercial denounces the idea that Hartman can be defeated in October and the State carried for Grant in November, and says the fact might as well be accepted at once, that the State must be carried in October if Grant is to be re-elected.

Hartman was nominated by trickery, and is very unpopular.

Warrington says: "No man can tell what new confusion may occur in New Hampshire within a few weeks. A very well informed New Hampshire man tells me that Rollins will get the Senatorship in New Hampshire. Of course, then, Grant will lose the State at once. The same result will follow Hawley's recent defeat in Connecticut."

## Evelyn Hope.

Beautiful Evelyn Hope is dead! Sit and watch by her side an hour. That is her book-shelf, this her bed; she plucked that piece of geranium flower, beginning to die too in the glass; Little has yet been changed, I think; The shutters are shut, no light may pass Save two long rays through the hinge of death.

Sixteen years old when she died! Perhaps she had scarcely begun her name; It was not mine to me to give; Her life had many a hope and aim, Duties enough and little cares, And what you would do with me in time, Till God's hand beckoned unawares— And the sweet white brow is all of her.

Is it too late, then, Evelyn Hope? For, your soul was pure and true, The good stars met in your horoscope, Made you of spirit, in my soul's full scope, And, just because I was three or four, And our paths in the world diverged so wide, And what you would do with me in time, We were fellow-mortals, naught besides?

No, indeed! for God above Is great to grant, as mighty to make, And creates the love to reward the love: I claim you still, for my own love's sake; And what you would do with me in time, Much is to learn and much to forget Ere the time be come for taking you.

But the time will come—at last it will, When, Evelyn Hope, what meant I (shall say) In the lower earth, in the years long still, Why your hair was amber, I shall divine, And your youth of your own geranium's red— And what you would do with me in time, In the new life come in the old one's stead.

I have lived I shall say so much since then, Given up myself so many times, Gained me the gains of various men, Ransacked the globe for the fruit of his qualities, And yet it had become a thing, Heat could not melt nor frost stiffen the new material. It was no longer irregular in elasticity. All stickiness was gone. The grand discovery had, in fact, been made, that caustic gum, raised to a high temperature by heat, and exposed to the fumes of brimstone, became vulcanized. Elate with success, Goodyear, first protecting his invention in the United States by patents and patents, started for England. Among the British experiments upon India rubber was Charles Hancock. To him proceeded our inventor.

Secure in the safety of his secret, instead of covering it by an English patent, he endeavored to sell it, named his price, and leaving his samples fearlessly in Hancock's laboratory, proceeded north. Scarcely was he out of sight when furnace and blow-pipe, retort and crucible, chemicals and gases, were put to work. The specimens of the new invention defied analysis. There they were, undeniably genuine caoutchouc, elastic beyond the native gum, inodorous, of natural color, soft and ductile—in every respect exactly the substance upon which Hancock had been experimenting for years, and yet divested of the element that hindered all practical production. They were not hungry plants. The most intense heat would not melt nor the severest frost stiffen them. They would neither stick when exposed to the heat of the blow-pipe, nor harden under exposure to the severest artificial cold. Foiled in his chemical efforts to solve the mystery, and yet reluctant to pay the price—£10,000 sterling—demanded by Goodyear for his secret, Hancock looked himself to his study. Between him and his competitor there had been letters exchanged for years. They treated of the subject kindred in interest to both. He now consulted these letters, compared the processes described, collated the results arrived at, noted the progress made from the beginning, and arriving at the point where both Goodyear and himself had been baffled, set himself to reflection. It was the old story of Pythagoras and the fifth problem of Euclid, Archimedes and specific gravity, or Cornelius Drebel and the red dye of Gobiin tapestry, Hancock guessed at sulphur. The experiment was tried. Failing once and again, he caused his furnaces to be brought to their highest power, and the temperature of 400° Fahrenheit, India-rubber gum submitted to the fumes of brimstone, became vulcanized caoutchouc. Long before Goodyear returned from the north, Hancock had patented the discovery. It was for years a subject of lawsuits. Into the question of priority of patent laws did not enter Goodyear also obtained a patent, but it was practically useless. For fourteen years, renewed afterward for seven years more, the exclusive use of the discovery of vulcanization of India-rubber, enriching its holder and his associates beyond millions of pounds sterling, remained with the competitor, and he really a stolen secret, but honest brains, perpetrated the theft.—[Harper's Magazine.]

Sumner's home is adorned by a new \$300 clock.

Prince Murat's wife is trying to obtain a divorce.

Beau-Hickman still contributes tone to Washington.

A kerosene lamp in Lynnfield, Mass., is credited with a \$4,000 fire.

A Wisconsin landlady jogged a tardy lodger's memory with a poker.

Wendell Phillips would resemble Voltaire more, did he favor Xantippe less.

Kilpatrick is affectionately termed the howling gibbousness of the lecture room.

Three Bangor youths cleaned eight hundred dozen snails in Penobscot River, in three hours.

Old fashioned weapons, once the property of buccaners, have been dug up at Abaco, in the Bahama Islands.

Leaving babies in baskets on the steps of well-to-do citizens is called putting children out to nurse, in Brooklyn.

"No end of people wish to be pious, but nobody wishes to be humble," says Rochefoucauld, in his satirical way.

Jesse Stackford, of Carrollton, Michigan, was symmetrically mutilated by an artistic buzz-saw a few days ago, losing both fore-fingers.

No newspapers or other scraps of paper in the street scare the horses of Council Bluffs, under the pains and penalties that shall fall thereon.

A cutlery manufacturing company in Pennsylvania, is said, to have made a five year contract for 600 Chinese operatives at thirty cents a day.

Robert Bein sixteen years old, while playing ball in Sheboygan, on Monday, was struck upon the temple by a ball, and so badly injured that he died.

A French writer, discussing a proposal to abolish capital punishment, remarked that he thought it was an excellent idea, but it was for the murderers to set the example.

H. S. Kidder, of Fulton, Wisconsin, realized \$1,922 from nine acres of tobacco. Tobacco is bound to be king in Rock county. Some 2,500 cases of tobacco have been packed by Janesville dealers this spring.

A Concord man fired seven shots from a revolver at a partridge a few days since, without hitting or scaring the bird, and then in disgust threw the empty weapon after the harmless bullets and knocked the bird's head off.

A citizen of Sycamore chased a "striped cat" out of his house the other day. He burned his clothes immediately after, and his wife went away on a visiting tour the next day, trailing a faint odor of carbolic acid.

A daughter of Sir Roger Tichborne is said to have turned up in Dorsetshire, having been "farmed out" under a fictitious name nearly twenty-one years ago, with a sealed document not to be opened until she came of age.

San Francisco proposes a tubular tunnel across the bay. It is to be twenty feet in diameter, of boiler iron, to be sunk from twenty-eight to thirty feet below the surface, and held in place by its own buoyancy and by cables and mushroom anchors.

Pins have been thought to be a comparatively modern invention; but the London Court Journal says that a collection of twenty-five well made pins has been found in the subterranean vaults of Thebes—showing that the modern pin is only a reinvention.

A daughter of Howes Mayo, of Frankfort, Maine, went to sleep on the 30th of April and did not wake until Sunday, May 12th, when she quietly inquired how long she had been sleeping. She seemed to be in usual health when she awoke, only a little exhausted.

According to a Massachusetts paper, the wreckers of Cape Cod are becoming almost as wicked as any of whom we read. They are in the habit of giving false information to skippers and displaying deceptive signals for the purpose of drawing vessels upon the rocks.

During the dark days of February an enterprising ground hog, a resident of the State of New York, started west in search of his shadow, and has now turned up, collar and all, in the game bag of a Wisconsin sportsman. What shadows we are, what shadows we pursue!

President Greely, of the French Assembly, is spoken of as a presidential machine, with one hand on his bell. It is said he received a letter from the wife of a deputy, begging he would ring in case he observed her husband throwing sheep's eyes at the ladies in the gallery.

Abijah McEwen, of Stratford, Connecticut, discovered a white powder on the surface of the water in his well a few days since, and on consulting a chemist found that it was arsenic. Frank Lally, who has had some dispute with McEwen, and who has made threats against him, was arrested on suspicion of attempting to poison the whole family and on Thursday was placed under \$5,000 bonds for trial.

The Boston Flower Mission, a most beautiful and delicate thought expressed in kindly and practical action, began its fourth year of work on Monday. The object of the mission is to furnish the sick and poor with flowers, and make their rooms pleasant and fragrant. Twice every week flowers are received and distributed, and they are regularly placed by the besides of the sick in each of the thirty or forty public and private hospitals in the city. Contributions of flowers are received from nearly all the towns in the vicinity of Boston.

## The Stolen Secret.

One of the most important discoveries of this century is the vulcanizing of caoutchouc, i. e., the process by which it is rendered insensible to cold and heat. Previous to 1843, as summer or winter weather prevailed, India-rubber fabrics stiffened or melted. This insensibility was the great hindrance to their use. Some half dozen inventors on this and the other side of the Atlantic had been experimenting upon this difficulty for several years. Charles Goodyear at last stumbled upon the secret. Over his little stove, in an attic chamber of an indifferent house in New Haven, he had melted the gum in a bottle slimmer with brimstone. It showed no change in coloring. Beyond alteration in form, the material appeared the same. It was elastic, dark in color, odorless as at first, lastless yielding to the touch, and unaltered in specific gravity. Apparently, it had suffered no alteration in any of its qualities. And yet it had become a new thing. Heat could not melt nor frost stiffen the new material. It was no longer irregular in elasticity. All stickiness was gone. The grand discovery had, in fact, been made, that caoutchouc gum, raised to a high temperature by heat, and exposed to the fumes of brimstone, became vulcanized. Elate with success, Goodyear, first protecting his invention in the United States by patents and patents, started for England. Among the British experiments upon India rubber was Charles Hancock. To him proceeded our inventor.

Secure in the safety of his secret, instead of covering it by an English patent, he endeavored to sell it, named his price, and leaving his samples fearlessly in Hancock's laboratory, proceeded north. Scarcely was he out of sight when furnace and blow-pipe, retort and crucible, chemicals and gases, were put to work. The specimens of the new invention defied analysis. There they were, undeniably genuine caoutchouc, elastic beyond the native gum, inodorous, of natural color, soft and ductile—in every respect exactly the substance upon which Hancock had been experimenting for years, and yet divested of the element that hindered all practical production. They were not hungry plants. The most intense heat would not melt nor the severest frost stiffen them. They would neither stick when exposed to the heat of the blow-pipe, nor harden under exposure to the severest artificial cold. Foiled in his chemical efforts to solve the mystery, and yet reluctant to pay the price—£10,000 sterling—demanded by Goodyear for his secret, Hancock looked himself to his study. Between him and his competitor there had been letters exchanged for years. They treated of the subject kindred in interest to both. He now consulted these letters, compared the processes described, collated the results arrived at, noted the progress made from the beginning, and arriving at the point where both Goodyear and himself had been baffled, set himself to reflection. It was the old story of Pythagoras and the fifth problem of Euclid, Archimedes and specific gravity, or Cornelius Drebel and the red dye of Gobiin tapestry, Hancock guessed at sulphur. The experiment was tried. Failing once and again, he caused his furnaces to be brought to their highest power, and the temperature of 400° Fahrenheit, India-rubber gum submitted to the fumes of brimstone, became vulcanized caoutchouc. Long before Goodyear returned from the north, Hancock had patented the discovery. It was for years a subject of lawsuits. Into the question of priority of patent laws did not enter Goodyear also obtained a patent, but it was practically useless. For fourteen years, renewed afterward for seven years more, the exclusive use of the discovery of vulcanization of India-rubber, enriching its holder and his associates beyond millions of pounds sterling, remained with the competitor, and he really a stolen secret, but honest brains, perpetrated the theft.—[Harper's Magazine.]

## Improved Stove.

When the last German Arctic expedition was about preparing for its voyage to the north pole, Capt. Koldewey asked the aid of scientific men in devising a stove that would answer the double purpose of supplying a sufficient amount of heat and of economizing the fuel. Various responses were made to this appeal, and among the patterns furnished that of Prof. Meidinger, of Karlsruhe was considered the best. This was simply an iron stove having a double wall, with a space about two inches wide between the outer and the inner one, to which the air was free access above and below. The cold air, being always at the bottom, and the warm air ascending, the heat was retained in a nicely. At the same time the air in the room is being constantly forced through the space between the outer and inner covering of the stove; or, what is the same, is being constantly heated. Connected with this is another ingenious device. The coal is put in from the top, and fills the whole inside of the stove, which is about five feet high, more or less. It is then lighted at the top, and kept burning by the draft created by valves inserted both in the side walls and at the bottom of the stove. The more valves there are the greater the heat, so that the temperature of the room can be regulated at a nicety. At the same time the air in the room is being constantly forced through the space between the outer and inner covering of the stove; or, what is the same, is being constantly heated. Connected with this is another ingenious device. The coal is put in from the top, and fills the whole inside of the stove, which is about five feet high, more or less. It is then lighted at the top, and kept burning by the draft created by valves inserted both in the side walls and at the bottom of the stove. ## INDIANA BANKING COMPLY.

Capital - \$220,000.

This Bank solicits the business of Manufacturers, Corporations, Merchants, Firms, and individuals needing banking facilities.

Favorable arrangements made with persons wishing to deposit money.

W. H. MORRISON, President.

## INDIANA NATIONAL BANK,

N. E. Cor. Washington and Meridian sts.

GEORGE TOWN, Pres. D. H. TAYLOR, Cashier.

Capital - \$500,000.

Surplus Fund - 100,000.

This Bank does a general banking business; makes loans and draws drafts on the principal cities in the Union.

Collections promptly made and remitted for.

Interest paid on deposits by special agreement in each case.

## Brocade Poplins!

Something new, and to be found only at

## SPADES INDIANA STORE.

White Suits, Very Cheap.

Open Every Evening.

M. H. SPADES.

## THE EVENING NEWS.

FRIDAY, MAY 17, 1872.

## THE CITY.

MINOR MENTION.

Governor Baker will remain absent until next week.

Prof. Black's annual concert will come off at the Academy, June 4.

Dr. Harvey and Waterman are victims to a high tariff on photographs.

The Indianapolis Mission is styled "The Little Church Around the Corner."

Rev. Richard Hargrave, D. D., will preach next Sabbath at Trinity M. E. Church.

The smallpox scare in the county jail is over. It arose from groundless reports.

The Fire Department were yesterday paid for one-half month's service—in all \$1,262.50.

The Indianapolis National Guards meet this evening to make arrangement for Decoration Day.

James M. Warren, of Evansville, was yesterday admitted to practice in the United States Court.

The banking firm of McEwen & Sons, of Columbus, were yesterday adjudged bankrupt on petition of their creditors.

The Chief of Police yesterday renewed the search of Market's premises, and unearthed an additional lot of steel bars, side leather, etc.

D. M. Berry's residence, corner East and Cherry, will be the gathering point to-night of the Plymouth Church Sunday School social.

Basse and Remer, the two Bee Line watchmen charged with stealing from the freight depot, have been set at liberty on \$1,000 bail, each.

The Fifth Ward Democracy last evening selected Hon. Joseph E. McDonald and William Christian delegates to the State Convention.

Frank Develin has been attacked with erysipelas, resulting from the injury to his head some days ago, and is now in a dangerous condition.

Seventy-five hundred dollars was drawn from the State Treasury yesterday afternoon to meet the House of Refuge expenses for the current month.

Fred. Hugel, of Helwig's chair factory, is the latest known employee whose fingers have been mangled by machinery. The accident occurred yesterday afternoon.

Grand Secretary Foster has made arrangements with the I. B. & W. Peru, Bee Line, Junction and L. N. & C. to return Grand Lodge delegates free on payment of full fare to this city. The Vandalla and E. & C. roads will return delegates upon payment of one-fifth fare.

The Fifth Ward Democracy last evening selected J. J. Bingham, Captain John Maloney, John Simpson, Samuel J. Mattler, Leopold Feibleman and R. McGill delegates to the State Convention, and passed a resolution commending Hon. John C. Shoenmaker and Hon. James B. Ryan for having discharged the "duties of their respective offices with fidelity and economy."

The Grand Jury of Marion county yesterday returned 35 indictments, as follows: Murder, 1; grand larceny, 30; petit larceny, 2; robbery, 1; incest, 1; selling liquor to minors, 3; desecration of the Sabbath, 18; assault and battery with intent to kill, 1; maintaining a public nuisance, 1; assault and battery, 1; disturbing a lawful meeting, 1; carrying concealed weapons, 1; selling liquors on the Sabbath, 11.

## Weather Bulletin.

St. Paul, Minn. 58, N. W. cloudy.

Vicksburg, Miss. 58, S. W. cloudy.

Wilmington, N. C. 72, N. E. fair.

## Presidents.

H. C. Sailors was yesterday presented with an elegant and costly gold-headed cane, the gift of J. W. Bagby. In addition to the name of the recipient and donor, "May 21, 1872" was engraved thereon, a date which is set to signalize an "event" yet to come off, at Macon, Georgia, wherein Mr. S. leads to the altar a young lady of that city.

## The Usual Verdict.

Information deemed reliable, made The News say yesterday that the Street Railway Company were censured by the Coroner's jury on account of the death of Cutting, the blind men. The verdict was in the usual stereotyped form, neither censuring nor exonerating any one. It is intimated that Cutting's relatives will bring suit against the railway company for damages, but under the circumstances and judging from the testimony before the Coroner's jury, they will find it extremely difficult to establish a case.

## Almost a "How."

Those quiet, courtly "lawyers of the olden school," Messrs. Jos. E. McDonald and G. H. Voss, yesterday became so "worked up" by the technicalities in the suit of Grantham vs. Ryan, in which they individually represented rival interests, that blows were on the point of being exchanged. When Judge Gresham came to the peace. It was curious to note these gentlemen displaying all the fire and vigor and pugilistic impetuosity of youth, seemingly as anxious to pummel one another with their fists as they had been a few minutes before with law authorities' weapons of offense and defense.

## A Lendicous Fight.

A contentions' war between a butcher and a carpenter yesterday evening on Circle street, near Meridian, had a most ludicrous termination. There were criminalities and recriminations innumerable, many threatenings but no blows. Finally the butcher, with a bullying shake of the head, started south on Meridian, ejaculating, "I'm a butcher, and a butcher never goes back on blood." This nullified the last hair on the carpenter's back; with a howl he rushed after his opponent, and by a powerful blow landed him in the gutter. The butcher smelt blood pungently, and although he "never went back" on it, turned his back and fled precipitately. As usual, the whipped man got arrested.

## A Natural Mistake.

Officer A. Arnel, at the Union Depot, prides himself upon his gallantry to the fair sex, and every fair dame or blushing damsel who applies to him for aid or information is certain of receiving unqualified assistance. Last night his attention was directed to two ladies who were trying to get on the Bee Line train—one nearly and strong, the other exhausted and almost dead from consumption. With a vigorous, manly grip Arnel "boosted" the well one up the steps, and then warbled off, leaving the disabled lady standing there unable to move. The officer afterwards contended that he thought he "had hold of the sick one," but nevertheless for several hours he was made the subject of much jesting and "sly fun" by those who witnessed the laughable circumstance.

## LOCAL ITEMS.

Why go two or three miles from the Circle, and pay \$800 for a lot when the same money will buy a lot just as good and as well located much nearer the center of the city? Many think the beautiful lots in Pettibone & Rickard's Highland Home Subdivision are the most desirable now offered. Barnard & Johnson will be most happy at any time to show them to parties desiring to invest.

Visit the ever reliable for men's or boys' suits at \$3, \$6, \$9, or \$12. It is at No. 6 West Washington street. The Arcade for bargains in every department.

Cable screw wire shoes at Boot Upside Down.

Cheap Hair Goods at Muir & Foley's, Miller's Block.

J. E. Downey, over Fletcher's Bank, has the exclusive agency for the sale of lots in Irvington. There are yet several beautiful lots unsold in this thriving suburb, and pleasant homes can be secured by men of moderate means.

Joe Emmet (harps) in town—at Benham's. Boys take notice.

## A Thriving Gulf Town.

The city of Pensacola, Florida, is one of those towns whose growth affords an index to the progress of the nation. Since the war it has advanced with rapid strides, and its remarkable natural advantages have enabled it to make this advance the more easily. Situated on a thoroughly land-locked harbor, covering an area of more than two hundred square miles, and at the end of an extensive railroad system, it is reaching it directly with Chicago and New York, it possesses advantages not surpassed by any other city on our southern sea-board. It has this great advantage over New Orleans, that it is close to the Gulf of Mexico, and not obstructed in commerce by shifting and treacherous bar. Vessels of considerable tonnage can be brought up to the wharves and loaded immediately from the railway cars. It is surrounded by a fertile and salubrious country, and derives no little importance from the fact that it will probably be the outlet for the coal and iron products of Alabama when the immense mineral regions of that State begin to be worked.

It may be mentioned as a matter of curiosity that the Russian fleet that conveyed the grand Duke Alexis from this country was supplied with Alabama coal, the first delivery of that mineral at Pensacola. Mobile will, of course, be her great rival in this branch of trade, but the railroad and navigation facilities of Pensacola are greatly superior, and give that city a decided advantage. During the year 1871, 68 vessels, having a tonnage of 235,675 tons and valued at \$1,512,144.00, were cleared from the port. Real estate may be considered a good investment.

## The Jelly Fish.

So large a portion of its bulk consists of water that one of no less than thirty-four pounds weight, being left to dry in the sun for some days, was found to have lost ninety-nine per cent. of its original weight. Writing of the not very attractive appearance of the huge jelly fish, Prof. Agassiz observes that "to form an idea of its true appearance, one must meet him as he swims along at mid-day, rather lazily with his huge semi-transparent disk, flexible-lobed margin, glittering in the sun, and his tentacles floating a distance of many yards behind him. Encountering one of these huge jelly fishes when out in a row-boat, we attempted to make a rough measurement of his dimensions upon the spot. He was lying quietly near the surface, and did not seem in the least disturbed by the proceeding, but as he moved the disk eight feet in length, to be laid across the disk which was seven feet in diameter. Backing the boat slowly along the line of the tentacles, which were floating at their utmost extension behind him, we measured these in the same manner, and found them to be rather more than the length of the boat, in space some hundred and twelve feet." This huge mass is produced by a hydroid measuring not more than half an inch in length when full grown.—(Scientific American.)

## THE STAGE.

John Brougham has been engaged for the next season by Augustin Daly.

W. Horace Lingard and Company are billed to perform at Bay City, Michigan, May 20th.

The Berger Family, Swiss bell ringers, and Sol. Smith Russell, humorist, are at Salt Lake City.

A powerful stage organ has been erected for Her Majesty's Opera, Theater Royal, Drury Lane.

Wagner's opera, the Meistersinger, has just been produced at Copenhagen with great success.

Strauss, the composer, has accepted an invitation to assist at the World's Peace Jubilee, in Boston.

The New York Star calls the pianist, S. B. Mills, the "monumental bangist of the nineteenth century."

A young Havarian has taken seven Indians to Germany, from Wisconsin, for the purpose of exhibiting them.

The Mattoon Opera House, just completed, cost \$70,000. Mr. Titus, the banker, is the moneyed man of the enterprise.

The eighteen performances of "Aida," which have hitherto taken place at the Scala, of Milan, have averaged 151,211.

Madame Mallinger, of Berlin, has been engaged for the Italian Opera House, St. Petersburg, for the beginning of next year.

It is reported that a new opera by H. Herve will be produced this summer in London, where the composer will soon arrive.

A new opera by Herr Wagner, entitled "The Deliverer of Germany," is in preparation at the Royal Opera House, Hanover.

The Mariotti Opera Troupe are announced to commence a short season at the Varieties Theater, New Orleans, on the 15th instant, with "Lucia di Lammermoor."

The Denver Theater, Denver, Colorado, with Fanny B. Price at the first seat, has been opened for the spring and summer season. Gabriella McKean is the leading lady.

Blind Tom performed at Bloomington, Illinois, May 10; Peoria, Ill.; and is billed at Galesburg, 13th; Monmouth, 14th; Aurora, 15th, and Chicago, 16th, 17th and 18th.

"Black Friday" was not a pecuniary failure for the managers of Niblo's after all. They cleared a net profit of \$3,500 in sixteen theatricals, and made a decided hit at the night before the piece was withdrawn.

The Theatre Royal, Montreal, C. E., was opened for the summer season under the management of Ben De Bar on May 6. Jas. W. Wallack was the stellar attraction, and "Henry Dunbar" the opening play.

It is stated upon good authority, says the Buffalo Express, that Miss Agnes Ethel, who created such a furore in that city some months ago, is engaged to a wealthy young gentleman of Brooklyn, Long Island.

The Almee Troupe leave on the 19th instant for San Francisco, having as their advance agent Mr. J. L. Zimmerman, long and favorably known from his connection in a similar capacity with the Parepa-Rosa Troupe.

Mrs. Fanny Foster, a lady who has had practice in amateur theatrical companies, but who has never before appeared on the theatrical stage, has made a decided hit at Wallack's as Grace Harkaway in "London Assurance."

A complimentary benefit in aid of the funds of the Philadelphia Typographical Society will take place at Musical Fund Hall in that city on Saturday evening, May 25. The entertainment will be given under the auspices of a number of prominent citizens of Philadelphia.

The complimentary benefit to Seignor Brignoli, announced for the 10th inst. at the Academy of Music, Philadelphia, was again postponed, this time indefinitely. But few tickets were sold, and the committee having the benefit in charge were not very energetic in their efforts to make the same a success.

Mlle. Pauline Lucca (Baroness von Raden), since her first appearance this season in "Fra Diavolo," in Mr. Gye's company at Covent Garden, has become the chief attraction of the London opera season. The musical journals of the English metropolis speak in the most enthusiastic terms about her, and it seems in voice and acting she has eclipsed all her former triumphs.

A grand vocal and instrumental concert was given at Concert Hall, Philadelphia, on the 10th inst. The chief feature was the re-appearance of Mr. J. L. Canross on the lyric stage, and he sang with his usual taste and expression a couple of ballads that won hearty encores. Mme. Behrens, Mme. Schimpf and Messrs. J. A. Arnold, W. A. Brown and A. R. Taylor also appeared.

William Cullen Bryant is to be the orator on the occasion of the unveiling of the Shakespeare statue in Central Park, May 23. Edwin Booth has expressed his willingness to recite some passages from Shakespeare, and Theodore Thomas's orchestra of 100 pieces, and the Liederkreis and Arion Societies will furnish music for the occasion.

Patti's farewell benefit in Vienna created an immense sensation. By special permission of the emperor drums were allowed to play the salute that is usually accorded only to royalty. At the conclusion of the performance she was invited to take her place on the throne erected on the stage, and the members of the orchestra and chorus paid their respects to the Diva.

The friends of Arthur Cheney, proprietor of the Boston Globe Theater, gave him a magnificent dinner Thursday night, and a superb vase, valued at \$1,500. Mr. Hilliard made a long and scholarly speech of welcome and presentation, and was followed by Mr. Cheney, Rev. Mr. Alger, W. R. Floyd, and others. Their affair is described as a great success; in fact, worthy the hosts and guests.

Keane's Grand Combination which opens at Mattoon on Saturday of next week, comprises a number of artists favorably known in this community. Mr. W. H. Halpine is a son of Miles O'Reilly, Harry Wilson, Fred Walsh, May Wilson and William Wilson, and others are with the company. Their piece de resistance is to be Rip Van Winkle. Mr. Joseph H. Keane in the title role, in which he has met with great success. They have chartered the steamer City of Boston, in which they will visit the South, and go up the Ohio as far as Pittsburgh, playing under canvas.

## Statistics of Odd Fellowship.

The yearly revenue of the order of Odd Fellows in the United States is now about \$3,500,000, and the average annual outlay for purposes of relief is \$1,000,000. The remainder is reserved as a fund to be called into use whenever required. The latest official statistics of the order are as follows: Number of members, 757,941; number buried, 49,019; total relief paid, \$16,543,247; total receipts, \$10,233,417; amount of investments and funds on hand, \$28,690,170.

## Take The New and Reliable Route TO CHICAGO.

## THE INDIANAPOLIS, PERU & CHICAGO RAILWAY CO.

Are now running Two Through Express Trains daily to CHICAGO via Michigan City, without change of cars, making close connections.

At CHICAGO for Milwaukee, Janesville, Madison, La Crosse, St. Paul, Rockford, Burlington, Dubuque, Peoria, Galesburg, Quincy, Burlington, Rock Island, Des Moines, Omaha and San Francisco.

At MICHIGAN CITY for Niles, Saginaw, Kalamazoo, Lansing, Holland, Grand Rapids and Muskegon, and all points in Michigan.

At LA PORTE for Elkhart, South Bend and Goshen.

At ELKHART for Fort Wayne, Toledo and Detroit.

HAMILTON & BOWKER.

## THE EVENING NEWS.

FRIDAY, MAY 17, 1912.

17. W. Barometer 29.695 | Thermometer, 67

### THE CITY.

A poor prospect for picnics to-morrow.

The season for railroad excursions is at hand.

A QUANTITY of newspaper talent will probably fall for a while.

INDIANOLA Church gives the first strawberry festival of the season at Association Hall to-night.

John McDowell, Esq., a prominent lumber dealer and enterprising citizen of Brazil is in the city.

NEWSPAPER circles are in a high state of excitement over actual and prospective changes.

Muir & Foley have opened a wholesale notion and hair goods store on South Meridian street.

FRANK LESLIE's and Harper's Weeklies for the current week are good. Cathcart & Cleland have them.

The crossing, corner of Washington and Meridian streets, needs the attention of the Street Commissioner.

GRAND SCRIBE Charles P. Carby will organize a Lodge of Knights of Pythias at Bloomington, Indiana, this evening.

WM. CLARKE, employed at King's pork-house, applied to the Surgical Institute this morning for relief for a broken hand.

A GREAT deal of foreign capital has been invested here within a year and most of it has gone into substantial improvements.

VINNEDGE, JONES & Co. report sales, since occupying their new building on South Meridian street, far ahead of their expectations.

The Baptist picnic and excursion, which was to have taken place to-morrow, has been deferred to next Saturday week on account of the rain.

A MODEL of filial piety plaintively remarked of his mother-in-law this morning that "the old woman couldn't expect to last over a week."

The "Railway War" ended last night by the German societies voting to go to the St. Louis Saengerfest over the Indianapolis and St. Louis road.

REV. TREADWELL WALDEN returned home from the East last evening. On Sunday next, at 10:30 A. M., the rite of confirmation will be administered by Bishop Talbot, in St. Paul's Cathedral.

SOME vandals have taken advantage of the liberty granted them in roving through the State Library, and have mutilated some of the books and engravings. The State Librarian will pay handsomely for their detection.

### The Wretch.

Nicholas Market was found guilty of maintaining a nuisance, by the Mayor in the City Court this morning. The defendant claimed that the putrid offal from the slaughter houses, the decayed vegetables, etc., found in his miserable habitation, were legitimate articles of food, and it is asserted upon apparently good authority that he manufactured sausage from this rotten stuff, and sold the same as a good article. Ugh! we echew sausage.

### GEORGE McDUGAL.

#### A Strange and Eventful Life Terminated

The telegraph has furnished news of the death of George McDougal, a gentleman widely known in this city, and a man of such marked character that a brief mention of his eventful career will be of general interest. He died in Washington on Wednesday night from the effects of poison taken by him. He was born March 4, 1819, and in February, 1840, was married to Miss Louisa Palmer, daughter of N. B. Palmer, Esq. Becoming infatuated with the dazzling rumors concerning the wealth of the West, he crossed the plains to California in 1845, and not long after his arrival there was actively and prominently engaged in wrestling and reclaiming that State from Mexican rule. Financially he was very prosperous, and on his return to Indianapolis in April, four years later, was possessed of considerable wealth. After a few months, stay he went again to California, coming back the following year. The latter part of 1850 he for the third time crossed the plains, and was shortly afterward joined in California by his family. In 1853 he rambled off to Utah and Salt Lake, went to Mexico in 1854, and during the years from 1854 to 1859, explored the entire country from the City of Mexico to the section now known as Denver City. In the fall of the last mentioned year he returned to California, and shortly afterwards started to Mexico, where he remained until 1865, and then left for South America, and "prospected" the entire southern portion of the continent—from one ocean to the other. It was while on this wonderful prospecting tour that he was discovered by Commander Brown in the Straits of Magellan—his only companions being Patagonian Indians. In September 1869, he came back to his friends in this city.

Mr. McDougal came from excellent parentage, and was a brother of Gov. McDougal of California. He had an iron constitution with tremendous power of endurance, had a clear brain, and possessed in an eminent degree the peculiar faculty of drawing and endearing men to him in the closest and firmest ties of friendship. Wherever he went he was always cordially received, and the highest as well as the lowest prized his companionship and valued him as a friend.

His life will stand marked as one of strange adventure. Probably no one has ever more thoroughly experienced the smiles and frowns of Dame Fortune than the subject of this sketch. He amassed several fortunes, which, if saved, would have made him one of the wealthiest men in the country. A trait of character was his profuse liberality. Like many others of such strong individuality, he had no enemy in the world but himself.

At the time of his death he was in Washington City for the purpose of presenting a claim against the Government for subsistence furnished the early immigrants. His remains will be brought to this city for interment.

### Amusement Matters.

We are sorry to be compelled once more to note a small attendance upon a representation of one of Shakespeare's plays. We are sure had theater-goers known the beauty of the piece, and the faithful manner in which it was to be put upon the stage, the Academy would have been better filled. "A Winter's Tale" is one of the least known and acted of Shakespeare's plays, principally, perhaps, because it requires so large a number of good actors to give it adequate representation. There are not less than ten parts which require first class acting to make the piece the success it was last night. The character of Hermione, while it gives less opportunity for powerful acting than that of Mary Stuart, has a wider range of feeling, and displayed the versatility of the great actress's genius to much better advantage. She is as effective in delineating the more kindly and domestic virtues, as in the higher range of the passions. Her smile has in it all the tenderness of the wife and mother, without abating one atom the dignity of the Queen. If there were any word beyond perfection, we should use it in speaking of her acting. Every movement and every attitude of repose is full of genius and instinct with grace, and fairer statue never left a sculptor's hand nor possessed his brain than she presented in the last act. Shakespeare himself could not have asked a better interpreter. Miss Placide appeared to better advantage than on the previous night, and carried off her full share of the honors. Mr. Levick's Leontes was well acted. He is an actor of no ordinary power. Gustavus Page, as Florizel, showed fine possibilities. DeGroat is an old favorite here, and is always sure of appreciation. For the rest, there is no fault to be found. If none did exceptionally well none fell below public expectation.

To-night Dickens' Bleak House, under the name of Chesney Wold, will be presented, and will probably draw a larger house.

### The Journal Sale.

An accredited rumor prevailed this forenoon that the Journal had been purchased by a combination, of which the Douglass boys were the principal parties. The "sale" included only the office, stock and good will, leaving the real estate still in the hands of Hasselman & Fishback.

At one o'clock this afternoon a News reporter interviewed Mr. Fishback in his "den," and was by him told that the Douglass trade was "off"—or, in other words, that the office had been sold to the Douglass combination and then repurchased within two hours; that he had an engagement at two o'clock, and one at three with a "purchaser," that there were any amount of first-class purchasers who wanted the office, but none of them had any money, (or words to that effect) etc. He further asked reporter if he "knew of any first-class purchasers, who wanted to buy a first-class paper running on its own momentum," to send them up. Singularly enough, reporter knew no paper for sale, nor purchaser, coming strictly under the head of first-class, consequently the "interview" ended, and the "reporter" and "reported" separated with the usual mutual disgust, etc. Selah.

### A Proposition.

It is expected that next summer will witness the building of a magnificent business block on the southwest corner of Meridian and Washington streets, and it is suggested that in case such expectation is realized that the owners of the real estate from the corner to Schurman's Block unite in building a large six or seven-story structure, the first two stories of which shall be set apart for business and the remainder fitted up as a grand central hotel. This real estate is owned by Mr. Hubbard, George McDougal, Mrs. Dr. Parry and Woolfen, Webb & Co. The front of the proposed block could be so designed as to present different views, or rather the appearance of several distinct houses, while in fact the whole structure would be one. The project might be a safe one, provided the "new hotel" is never completed. Anyhow it is worth canvassing by those most directly interested.

## FOR THE NECK.

Very choice Windsor Scarfs, in new Grenadines and Crepe de Chine.

R. R. PARKER.

Shirts and Mens Furnishings, also, superb shades in Frosted Silk Ties.

ner to Schurman's Block unite in building a large six or seven-story structure, the first two stories of which shall be set apart for business and the remainder fitted up as a grand central hotel. This real estate is owned by Mr. Hubbard, George McDougal, Mrs. Dr. Parry and Woolfen, Webb & Co. The front of the proposed block could be so designed as to present different views, or rather the appearance of several distinct houses, while in fact the whole structure would be one. The project might be a safe one, provided the "new hotel" is never completed. Anyhow it is worth canvassing by those most directly interested.

### A Disguised Interviewer.

Lee Mandeville G., editor of the "Luminary," was very much exercised over the reported sale of the Sentinel some days ago, and concluded to interview the senior proprietor. The following colloquy is said to have ensued:

Luminary—"Mor'n sir."

S. P.—"Good morning."

Luminary—"Upon the street are rumors of the sale of the Sentinel, and everybody I meet wants to know, you know, I have therefore called for the necessary information."

S. P.—"You are then very anxious to tell them the exact truth?"  
Luminary—"Yes, oh, yes; yes, indeed. Truth is my best hold."  
S. P.—"Then tell them you don't know. Good morning."

A veil is drawn over the scene that followed, and silence is maintained concerning the hasty departure of the enterprising "Luminary."

### School Revenue.

County Auditor Hamilton yesterday returned to the Superintendent of Public Instruction his report of the amount of school revenue collected during the six months ending May 1, 1911:

Amount collected since last report and not before reported and apportioned.....\$38,000 00  
Amount of interest collected..... 4,788 32  
Amount collected from liquor licenses..... 7,230 00  
Amount collected from unclaimed fees..... at 60

Total amount ready for apportionment.....\$70,419 32

To the above amount should be added \$1,382 05, income derived from the Congressional township fund, deferred payments for school bonds, etc.

### Dastardly Outrage.

About nine o'clock last evening two young German girls, walking along on Tennessee street, above North, were assaulted with criminal intent, by two ruffians, who sprang out from an adjacent alley. One of the girls was thrown to the ground, the other managed to break away from her assailant. The screams and shrieks of the females aroused Mr. Patterson and some of the other neighbors, and their coming compelled the ruffians to desist, and take flight up the alley, where, owing to the darkness, they were enabled to distance pursuit. The girls can not identify their assailants further than that they were colored men.

### Transfers of Real Estate.

The following transfers were filed for record since noon yesterday:

Stephen K. Fletcher to Charles Martindale, lots 69 and 75 in Fletcher's 1st Brookside add, \$2,000.

D. L. Thomas et al. to Christina Penn, lot 59 in Colburn's sub of outlet 1-4, \$2,500.

## What Will be Worn

FOR HATS

DURING THE WARM WEATHER.

See them at

## The Niff Brothers

"HATTERS OF THE PERIOD,"

Opposite Palmer House.

The fabrics of which the splendid spring clothing is made now offered for sale at the Indianapolis One Price Clothing House, are the very best offered by the mills of this country and of Europe. The colors are of every rich and beautiful hue. See the styles at 15 West Washington street.

Lend your aid to charity by being present at the strawberry festival of the Indianapolis Mission Sabbath School this evening.

The workmanship and the finest articles of ornament at the hall of beautiful designs, 24 East Washington street, is nothing short of superlative. The variety of assortment at Craft & Cutler's is not surpassed by that of any other existing stock.

When in the course of human events it becomes necessary to, as it does every day, for the ladies to go shopping, we would suggest to them the propriety of calling at 42 South Illinois street, where they will find an elegant assortment of millinery, hats, bonnets, flowers, ribbons, gloves and notions as is not often placed on shelves and show cases for mortals to gaze upon. County's prices are still popular.

A beauty. The summer style of hat just brought out by Ike Davis, Conner & Co. is a beauty and can not be excelled in this generation. Ike & Co. show them for money at 22 West Washington street.

Harry Fowler's Art Studio, 21 and 26 East Washington street, is visited daily by hundreds, and every one comes away happy.

Of all the choice condiments that belong to the well furnished table, as chow, pea soup, etc., none is so much prized as a standard relish for soups, fish and meats as the Halford, Leicestershire Table sauce, at once the best and cheapest of them all.

Parasols and Fans at half price, at Muir & Foley's, 60 North Illinois street.

We can not see the reason why people will patronize wild cat insurance companies, when there are so many first-class companies to select from. Take, for instance, the Home Fire, of New York. This company is the leading fire insurance company of the United States, and is deserving of all the patronage which it receives.

North Pole Soda Water and Cream Syrup, made from the fruits which grow in the direction of the South Pole, at the Indianapolis Mission Sabbath School Strawberry Festival this evening.

Have you seen them? The cable screw wire boots and shoes, at Boot Upside Down.

### Greeley, Greeley.

Hurrah for Greeley, or hurrah for the Palmer House Hat Store, where Greeley hats, Grant hats, silk hats, straw hats, and all kinds of hats and caps may at all times be found.

The styles of hair goods, as they appeared at the Academy of Music the past week, are the leading ones, and they were brought out by Medina, at his Temple of Fashion, 31 North Pennsylvania street.

### BUSINESS NOTION.

#### Delicate Creatures.

This is the phrase applied by His Blackness, the Moor of Venice, to the fair ladies of Italy. It was the lovely complexion of Desdemona, such a radiant contrast to his own, that won his heart; and sooth to say, every man of discernment considers a fair skin like a sweet voice, "an excellent thing in woman." Now this is a charm which can be acquired. There is a healthful and odoriferous toilet article, known everywhere as Hagan's Magnolia Balm, which literally transfigures a cloudy or sallow skin, suffusing the discolored face, neck, arms and bosom with a soft, pearly luster, and imparting to the surface smoothness and a gloss like that of polished marble. Instead of clogging the pores, like the sticky enamels, or contracting with them, and thus obstructing perspiration, like the stringent cosmetics, it cleanses the skin from all impurities and wonderfully improves its texture. This peculiarity is particularly appreciated by our rural belles, who find that the coarseness and roughness, which country air is apt to engender, are speedily removed from their faces, hands and arms, by this delightful preparation.
